

ACKNOWLEDGEMENT

It gives us immense pleasure to write an acknowledgement to this project, a contribution of all people who helped me realize it.

We are very thankful to our Principal **Dr. M.S. Bhagyasheker**, VKIT, Bengaluru, for being kind enough to provide me an opportunity to work on a project in this institution.

We would like to convey our heartfelt thanks to our HOD **Prof. Chandramma R**, for giving us the opportunity to embark up to this topic and

We would like to sincerely thank our project guide **Mr. S. Suresh Kumar** for his invaluable guidance, constant assistance, support and constructive suggestions for the betterment of the project, without which this project would have not been possible.

Finally, it is a pleasure and happiness to the friendly co-operation showed by all the staff members of computer science department, VKIT.

ABSTRACT

Nowadays Computer Graphics used in almost all the areas ranges from science, engineering, medicine, business, industry, government, art, entertainment, education and training. Computer graphics methods are now commonly used in making motion pictures, music, videos, games and sounds. Sometimes graphics objects are combined with the actors and live scenes. Computer Aided Design methods are routinely used in the design of buildings, automobiles, aircraft, watercraft, spacecraft computers, textiles and many other applications.

It is a computer version of the simple board game usually play in daily life. About the dice rolling, coins moving as per the numbers indicated by the dice. Whoever first reaches all his coins on to HOME area is the winner. Here the implementation is done for a version of two players and two coins.

TABLE OF CONTENTS

1	Acknowledgement	i
2	Abstract	ii
3	List of Figures	iii
4	Table of Contents	iv
CHAPTER NO.	NAME OF THE CHAPTER	PAGE
Chapter 1	Introduction	1-4
1.1	Computer Graphics	1
1.2	History	1
1.3	Applications in Computer Graphics	2
1.4	Statement of the Problem	3
1.5	objectives	3
1.6	Introduction to OpenGL	4
Chapter 2	System Analysis and Procedure to Play	5-6
2.1	System Analysis	5
2.2	Procedure to Play	5
2.3	Hardware and Software requirements	6
Chapter 3	Design And Implementation	7-19
3.1	Graphic Function	7
3.2	Game Design	9
3.3	Source program	10
3.4	Flow Chart	15
3.5	Result	16
Chapter 4	Conclusion and Future Enhancement	20
4.1	Conclusion	20
4.2	Future Enhancement	20
	Bibliography	21

LIST OF FIGURES

Figure No.	Title	Page No.
Figure 1.1	Library Organization of OpenGL.....	4
Figure 3.1	Flow Chart for main ().....	9
Figure 3.2	Initial window of Game.....	16
Figure 3.3	Loaded Game.....	16
Figure 3.4	Player1's Coin move out.....	17
Figure 3.5	Both players coin in the game.....	17
Figure 3.6	Both players coin after capturing returned back.....	18
Figure 3.7	Player2 about to win on next move.....	18
Figure 3.8	Player2 won the game.....	19
